

Mark Grant

Web Developer

Projects

Backlog Roulette [v1](#) | [v2](#)

The gamer simply inputs the name of a game they enjoyed and the app spins a roulette wheel telling them what they will play next.

Tech v1: jQuery | GiantBomb API | Materialize | Heroku | Firebase

Tech v2: React | Fetch API | Lodash | Webpack 3 | Babel | ES6 | Materialize | GiantBomb API | Steam API

WikiTeadia [v1](#) | [v2](#) - Coming soon!

A decoupled, user updateable, single source of truth for all information regarding traditional Chinese teas. Made as a native phone app.

Tech v1: AngularJS | Ionic Framework v1 | ngMaps | Node.js | Expressjs | Knex.js | PostgreSQL | Google API | Bootstrap

Tech v2: React | Redux | React Router | Fetch API | JSX | ES7 | Lodash | Webpack 3 | Babel | Node.js | Expressjs | Knex.js | PostgreSQL | Materialize

[Kim Blog Un](#)

A tasteless, decoupled blog based on the life and times of Kim Jong Un, the current leader of North Korea. A precursor to my own blog which will use ReactVR. Will not be published...

Tech: React | Fetch API | Webpack 3 | Babel | Node.js | Expressjs | Knex.js | PostgreSQL

Random

Built a very simple CRUD app using Ruby on Rails
